12. Monitoring and review

Vision & Values

Vision Statement

Let your light shine.

Access and ambition for all to enjoy life in all its fullness.

Foundational Scripture

Matthew 5: 16 In the same way, let your light shine before others, that they may see your good deeds and glorify your Father in heaven.

Our school values are rooted in the Sermon on the Mount and are the basis of all relationships, decisions and direction of our school.

School Values

Our school values are at the heart of our everything we do in school. We aim to provide high quality learning opportunities which help foster these values within children. Our values are

Friendship

Thankfulness

Hope

Unity

Compassion

Forgiveness

Justice

Endurance

Trust

At Hoole Church of England Primary School, we aim to help children become:

- **Enthusiastic, curious, independent thinkers – motivated, reflective and resilient learners** who persevere when faced with challenges and who celebrate their achievements and those of their friends;
- **Respectful, compassionate and kind friends** who are able to work with others, forgive, trust, support and communicate with others;

- **Confident, thankful individuals** who understand their own worth; how to stay safe and healthy and how to manage feelings and relationships;
- **Tolerant and responsible citizens** who show respect for others, and a commitment to appreciate and contribute positively to the world around them.

Statement of intent

Hoole Church of England Primary School will ensure that pupils with medical conditions receive appropriate care and support at school, in order for them to have full access to education and remain healthy. This includes the safe storage and administration of pupils' medication.

The school is committed to ensuring that parents feel confident that we will provide effective support for their child's medical condition, and make the pupil feel safe whilst at school.

For the purposes of this policy, "medication" is defined as any prescribed or over the counter medicine, including devices such as asthma inhalers and adrenaline auto-injectors (AAIs). "Prescription medication" is defined as any drug or device prescribed by a doctor. "Controlled drug" is defined as a drug around which there are strict legal controls due to the risk of dependence or addiction, e.g. morphine.

1. Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Equality Act 2010
- Children and Families Act 2014
- DfE (2015) 'Supporting pupils at school with medical conditions'
- DfE (2017) 'Using emergency adrenaline auto-injectors in schools'

This policy operates in conjunction with the following school policies:

- Supporting Pupils with Medical Conditions Policy
- First Aid Policy
- Allergen and Anaphylaxis Policy
- Complaints Procedures Policy

2. Procedures for the administration of medication in schools

NHS West Cheshire Clinical Commissioning Group has agreed a policy in supporting self-care for minor and self-limiting conditions. The policy states that for these conditions, patients (or their parents/carers) are encouraged to self-care, and are expected to buy over-the-counter medicines when appropriate. Therefore, GPS will not routinely prescribe these medicines.

3. Administering over the counter medication in the light of the NHS West Cheshire Clinical Commissioning Group Policy

We, as a school, are now permitted to administer over-the-counter medicines when appropriate.

Written permission from parents/carers must be obtained before administration. This should be done using the school form.

Examples of medicines that do not require a prescription and which parents/carers can give permission to administer include:

- Paracetamol, ibuprofen or antihistamines – provided they are supplied in packaging with clear dosage instructions that are appropriate for the child;
- Moisturising/soothing preparations for minor skin conditions.

All medication must be in the original container and show dosage/expiry date.

Arrangements can also be made for parents/carers to come into school to administer medication if required.

On arrival at school, all medication is to be handed to the school office by the parent/carer who is responsible for ensuring that the school form to authorise administration of medication is completed accurately.

4. Roles and responsibilities

The governing board is responsible for:

- The implementation of this policy and procedures.
- Ensuring that this policy, as written, does not discriminate on any grounds, including the protected characteristics as defined by the Equality Act 2010.
- Ensuring the correct level of insurance is in place for the administration of medication.
- Ensuring that members of staff who administer medication to pupils, or help pupils self-administer, are suitably trained and have access to information needed.
- Ensuring that relevant health and social care professionals are consulted in order to guarantee that pupils taking medication are properly supported.
- Managing any complaints or concerns regarding this policy, the support provided to pupils, or the administration of medication in line with the school's Complaints Procedures Policy.

The headteacher is responsible for:

- The day-to-day implementation and management of this policy and relevant procedures.
- Ensuring that appropriate training is undertaken by staff members administering medication.
- Ensuring that staff members understand the local emergency services' cover arrangements and that the correct information is provided for the navigation system.
- Organising another appropriately trained individual to take over the role of administering medication in case of staff absence.
- Ensuring that all necessary risk assessments are carried out regarding the administration of medication, including for school trips and external activities.

All staff are responsible for:

- Adhering to this policy and supporting pupils to do so.
- Carrying out their duties that arise from this policy fairly and consistently.

Parents are responsible for:

- Keeping the school informed about any changes to their child's health.
- Completing an administering medication parental consent form prior to them or their child bringing any medication into school.

- Discussing medication with their child prior to requesting that a staff member administers the medication.

It is both staff members' and pupils' responsibility to understand what action to take during a medical emergency, such as raising the alarm with the school nurse or other members of staff. This may include staff administering medication to the pupil involved.

5. Training staff

All staff will undergo basic training on first aid and the administering of medication to ensure that pupils receive their medication from a trained member of staff. The headteacher will also ensure that a sufficient number of staff have been trained in administering medication in an emergency by a healthcare professional.

Training will also cover the appropriate procedures and courses of action with regard to the following exceptional situations:

- The timing of the medication's administration is crucial to the health of the child
- Some technical or medical knowledge is required to administer the medication
- Intimate contact with the pupil is necessary

Staff members will be made aware that if they administer medication to a pupil, they take on a legal responsibility to do so correctly; therefore, staff will be encouraged not to administer medication in the above situations if they do not feel comfortable and confident in doing so, even if they have received training.

Training for administering AAls

The school will arrange specialist training where a pupil in the school has been diagnosed as being at risk of anaphylaxis. As part of their training, all staff members will be made aware of:

- How to recognise the signs and symptoms of severe allergic reactions and anaphylaxis.
- Where to find AAls in the case of an emergency.
- How to respond appropriately to a request for help from another member of staff.
- How to recognise when emergency action is necessary.
- Who the designated staff members for administering AAls are.
- How to administer an AAI safely and effectively in the event that there is a delay in response from the designated staff members.
- How to make appropriate records of allergic reactions.

There will be a sufficient number of staff who are trained in and consent to administering AAls on site at all times.

6. Receiving, storing and disposing of medication

Receiving prescribed medication from parents

The parents of pupils who need medication administered at school will be sent an administering medication parental consent form to complete and sign. The signed consent form will be returned to the school and appropriately filed before staff can administer medication to pupils. A signed copy of the parental consent form will be kept with the pupil's medication, and no medication will be administered if this consent form is not present. Consent obtained from parents will be renewed regularly.

The school will only store and administer prescribed medication.

Parents will be advised to keep medication provided to the school in the original packaging, complete with instructions, as far as possible, particularly for liquid medications where transfer from the original bottle would result in the loss of some of the medication on the inside of the bottle. This does not apply to insulin, which can be stored in an insulin pen.

Storing pupils' medication

The school will ensure that all medications are kept appropriately, according to the product instructions, and are securely stored. Medication that may be required in emergency circumstances, e.g. asthma inhalers and AAls, will be stored in a way that allows it to be readily accessible. All other medication will be stored in a place inaccessible to pupils. Medication is held securely in the school office.

Medication stored in the school will be:

- Kept in the original container alongside the instructions for use.
- Clearly labelled with:
 - The pupil's name.
 - the name of the medication.
 - The correct dosage.
 - The frequency of administration.
 - Any likely side effects.
 - The expiry date.
- Stored alongside the accompanying administering medication parental consent form.

Medication that does not meet the above criteria will not be administered.

Disposing of pupils' medication

The school will not store surplus or out-of-date medication. Where medication and/or its containers need to be returned to the pupils' doctor or pharmacist, parents will be asked to collect these for this purpose.

Needles and other sharps will be disposed of safely and securely, e.g. using a sharps disposal box.

7. Administering medication

Medication will only be administered at school if it would be detrimental to the pupil not to do so.

Staff will check the expiry date and maximum dosage of the medication being administered to the pupil each time it is administered, as well as when the previous dose was taken.

Administration of medication is checked and verified by a second member of staff.

Before administering medication, the responsible member of staff should check:

- The pupil's identity.
- That the school possesses written consent from a parent.
- That the medication name, dosage and instructions for use match the details on the consent form.
- That the name on the medication label is the name of the pupil being given the medication.
- That the medication to be given is within its expiry date.
- That the pupil has not already been given the medication within the accepted frequency of dosage.

If there are any concerns surrounding giving medication to a pupil, the medication will not be administered and the school will consult with the pupil's parent or a healthcare professional, documenting any action taken.

If a pupil cannot receive medication in the method supplied, e.g. a capsule cannot be swallowed, written instructions on how to administer the medication must be provided by the pupil's parent, following advice from a healthcare professional.

The school will not be held responsible for any side effects that occur when medication is taken correctly.

Written records will be kept of all medication administered to pupils, including the date and time that medication was administered and the staff involved. Records will be stored in accordance with the Records Management Policy.

8. Medical devices

Asthma inhalers

Inhalers are held in class medical boxes.

The school will ensure that spare inhalers for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working.

AAIs

AAIs for designated children are held in the school office.

The school will ensure that spare AAIs for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working. Emergency AAIs are held in the school office.

Medical authorisation and parental consent will be obtained from all pupils believed to be at risk of anaphylaxis for the use of spare AAIs in emergency situations. The spare AAIs will not be used on pupils who are not at risk of anaphylaxis or where there is no parental consent. Where consent and authorisation has been obtained, this will be recorded in the pupil's IHP.

Pupils' and spare AAIs will be obtained, stored and administered in line with the school's Allergen and Anaphylaxis Policy.

9. Individual Health Care Plan (IHPs)

For pupils with chronic or long-term conditions and disabilities, an Individual Health Care Plan (IHP) or Asthma Plan will be developed in liaison with the pupil, their parent, the headteacher, the Inclusion Leader and any relevant medical professionals.

When deciding what information should be recorded on an IHP, the following will be considered:

- The medical condition and its triggers, signs, symptoms and treatments
- The pupil's resulting needs, such as medication, including the correct dosage and possible side effects, medical equipment, and dietary requirements
- What to do in an emergency, including whom to contact and contingency arrangements
- What is defined as an emergency, including the signs and symptoms that staff members should look out for

The governing board will ensure that Individual Health Care Plans or Asthma Plans are reviewed at least annually. IHPs will be routinely monitored throughout the year by a designated staff member.

10. Educational trips and visits

In the event of educational trips and visits which involve leaving the school premises, medication and medical devices will continue to be readily available to staff and pupils.

Medication will be carried by a designated staff member for the duration of the trip or activity.

There will be at least one staff member who is trained to administer medication on every out-of-school trip or visit which pupils with medical conditions will attend. Staff members will ensure that they are aware of any pupils who will need medication

administered during the trip or visit, and will ensure that they know the correct procedure, e.g. timing and dosage, for administering their medication.

If the out-of-school trip or visit will be over an extended period of time, e.g. an overnight stay, a record will be kept of the frequency at which pupils need to take their medication, and any other information that may be relevant. This record will be kept by a designated trained staff member who is present on the trip and can manage the administration of medication.

All staff members, volunteers and other adults present on out-of-school trips and visits will be made aware of the actions to take in a medical emergency related to the specific medical needs and conditions of the pupil, e.g. what to do if an epileptic pupil has a seizure.

11. Medical emergencies

Medical emergencies will be handled in line with the First Aid Policy.

For all emergency medication stored by the school, the school will ensure it is readily accessible to staff and the pupil who requires it, and is not locked away.

12. Monitoring and review

This policy will be reviewed annually by the governing board and headteacher. The next scheduled review is May 2026.

Records of medication administered on the school premises, or on school trips and visits, will be monitored, and the information recorded will be used to improve school procedures.

Staff members trained in administering medication will routinely recommend any improvements to the procedure. The school will also seek advice from any relevant healthcare professionals as deemed necessary.
